

# Zembro Essentials Comfort

- Zembro Essentials Comfort is a 4G LTE alert for those who prefer a wristband solution.
  - Simple & accessible alert to call for help in an emergency & easily cancel in case of accidental presses.
  - With touchscreen, excellent audio / visual quality & a replaceable wristband.
  - Caregivers can speak directly to the wearer via 2-way audio to offer reassurance.
  - Easy to use charging station with charging voice assist means users are clearly informed when to charge their device .
- The Zembro Safetrx suite monitors all alert metrics for reporting purposes & provides easy device management.
  - Care-givers and residences can expand their service to include :
    - In depth monitoring of the nature of the services performed during the summons.
    - Location patterns of each user.
    - Activity measurements (Step Counter)
    - These detailed metrics can drive the service level and staffing optimization efforts.
    - Staff efforts can be coordinated via the Zembro collaborative web application.

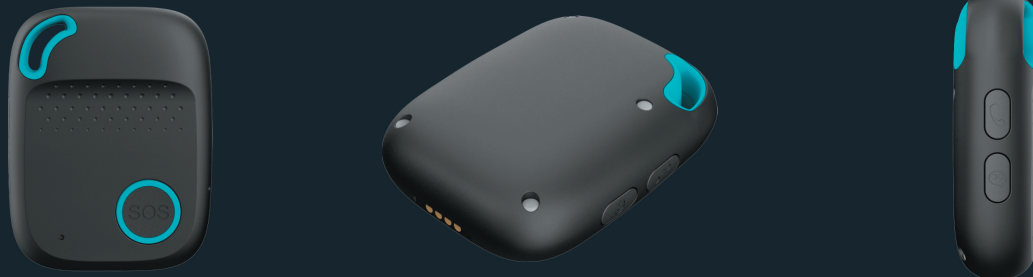

Dimensions	47.5 mm x 16.9 mm
Weight	65 g
Battery	Rechargeable, 3.7 V, 580 mAh
Charging Voltage	5 V DC
Waterproof	IPX7 under IEC standard 60529
Location Technologies	GPS, BLE, WiFi, LBS

# Zembro Essentials Mini

- SOS 4G LTE Call Button with 2-Way Voice Communication, for in/outdoor location monitoring
  - Summon assistance easily with a large, visible button in a discrete, lightweight design;
  - Care staff is immediately alerted with the resident's name & precise location;
  - 2-Way audio allows caregivers to speak to the users immediately;
  - Users are reminded to recharge their device thanks to clear voice prompts & an easy to use charging cradle;
  - OTA configurable;
- Mini is integrated with the Zembro Safetrx platform, so all alert metrics are centralized instantaneously in one easy to follow overview
- Alarm data can be collected for reporting purposes,
  - From when a summon was raised to when & by whom service was completed.
  - Care homes and Response Centres can customise metrics to include:
    - The nature of the services performed during the summons.
    - Exclude zones from tracking to heighten user privacy.
  - Mini can be used w/ BLE beacons for indoor tracking & location patterns.
  - These metrics can drive service level and staffing optimization efforts.
  - Our collaborative web app means care staff can quickly and easily coordinate efforts.
