

## Product Description

Faux Steel I-BEAMS and Plates are made of premium extruded PVC and are maintenance free. The Beams are extremely rigid, but flexible for easy install, and have a full memory so they will not lose their shape.

Create a modern industrial look by easily installing on any ceiling, wall, or combination. The I-BEAMS are installed using a simple T-Trim that screws into the ceiling, and the Faux Steel I-BEAM wraps around it, so no further fastening is needed.

End to end Faux Steel I-BEAMS are attached using decorative Faux Steel I-BEAM Plates with or without a nut and bolt look.

## Materials

Faux Steel I-BEAMS and Plates are premium extruded PVC.

Faux Steel Nut/Bolt Sets are rigid nylon.

Faux Steel Caulking is acrylic/water based.

## Limitations

Faux Steel I-BEAMS do not add to the structural load bearing capacity of the substrate to which it is being applied. All Faux Steel I-BEAM products are decorative and have been designed to give the appearance of a real steel beam.

## Applications

Interior: ceiling accents, wall to ceiling accents, wall accents, false headers, room partitions.

Exterior: Not exterior tested, so recommended to be used out of direct sunlight and the elements. In covered areas, good for ceiling accents, wall to ceiling accents, wall accents,

## Advantages

Super Durable

Non-Toxic

Flame Resistant

Install Friendly

Lightweight

Super Realistic

## Design

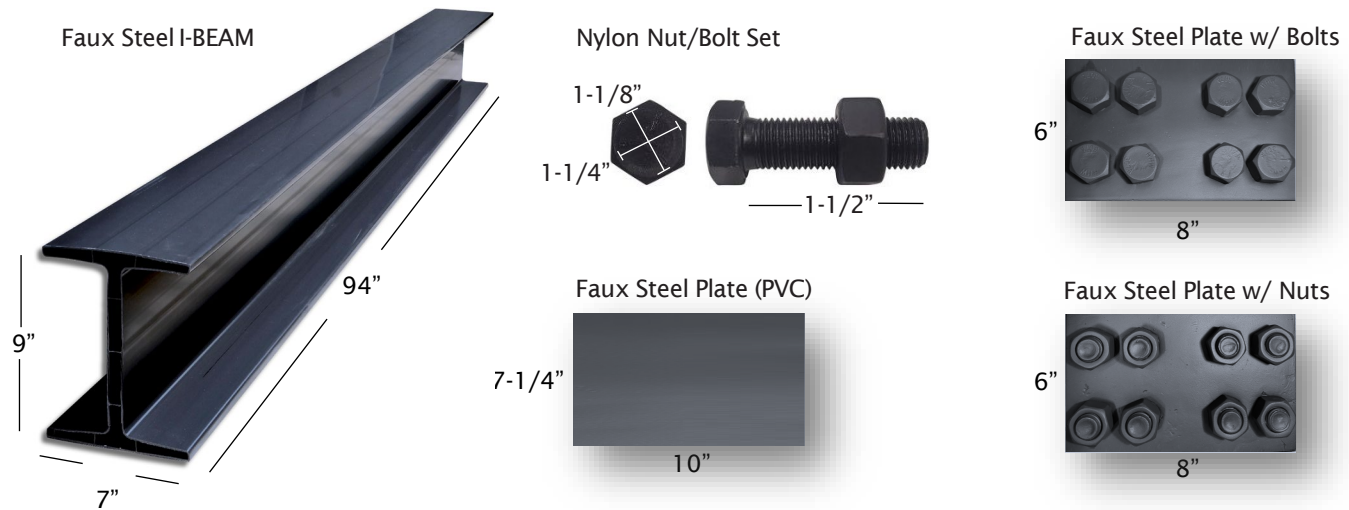

Faux Steel I-BEAMS come in a very realistic Steel Grey color, which is also paintable if a black or rusty beam look is desired.

Custom design colors are available for very large projects.
