

2019 Roxor Trailer Light Out

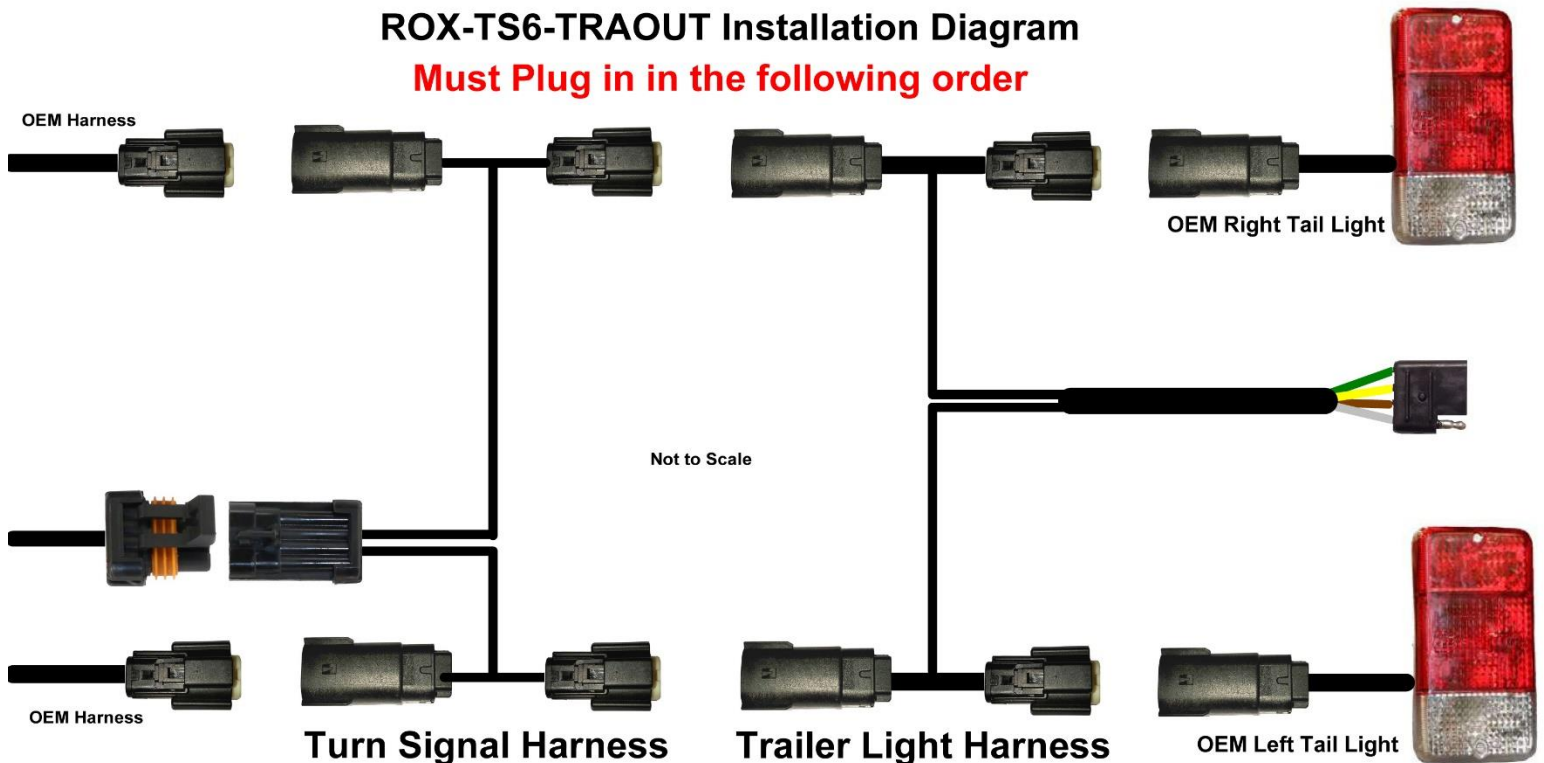

Thank you for purchasing XTC Power Products Roxor Turn Signal Trailer Light Out. This kit is completely plug and play, no wires to cut, no crimping, just plug it into the OEM harness.

Note: This harness only works if XTC Turn Signal System is installed.

1. Starting at the center of the bumper, run the connector with the green wire through the bumper to the right-side rear taillight. Un-plug the Turn Signal Connector from the taillight and install the new plug in-line. See Diagram Below!
2. Do the same for the Left/Drivers Side and plug in-line making sure like above the New harness is last to plug in-line.
3. Run the Flat 4-Way connector through the Bumper rear portion down to the trailer hitch.
4. Secure the Harness with the provided cable ties, bundle up any extra drop length not used behind bumper.
