GOosafe in IVF Laboratories

OOSAFE® AIR CLEANER KN

OOSAFE® AIR CLEANER KN IS AN ADVANCED EQUIPMENT DESIGNED FOR IVF LABORATORY USE WHICH PURIFIES AIR AGAINST VOLATILE ORGANIC COMPOUNDS (VOCs), CHEMICALLY ACTIVE COMPOUNDS (CACs), PARTICLES, MICROORGANISMS, TOXINS, SOLVENTS AND ODOR.

Oosafe® Air Cleaner KN

Manufactured according
to ISO 9001 Quality
Management System

OOSAFE® AIR CLEANER KN

- **Better air quality, better embryo development:** Oosafe® Air Cleaner KN purifies the air in laboratories and improves embryo development. Oocytes and embryos do not have an immune system to fight against toxic compounds.
- **More activated carbon, more VOC removal capacity:** Canister Carbon Filter Set consists of 5 pieces of tall activated carbon canisters made of pure activated carbon which gives unmatched VOCs removal capacity.
- **No chemicals inside:** High quality purified air is guaranteed by pure materials only. Chemicals inside the filters may be dangerous to human health and embryo development.
- **Pure activated carbon, the only way to trap VOCs:** VOCs cannot be trapped by HEPA filters because their size is smaller than the HEPA filter's pore size. VOCs can only be trapped inside activated carbon.
- **45° air blowing:** Faster air purification with 45° air blowing system.
- **Bigger HEPA Filter:** Bigger HEPA filter for longer replacement period and better air quality, purifies air against particles and microorganisms.
- **Alarm function:** Specific sensors are used to define the exact time when filters should be replaced.
- **Low noise level:** Higher user comfort is achieved with very low noise level (lower than 50dB (A) at full speed and 42dB (A) at half speed).
- **Approved by scientists:** Oosafe® Air Cleaner KN has been used for many years in well-known IVF clinics all over the world as the main air purification device.
- **Initial filter set:** Oosafe® Air Cleaner KN comes with Main Prefilter, Canister Carbon Filter Set and HEPA filter.
- **Optional:** 4 stage filtering with Dual Extra Prefilter is possible.

OOSAFE® AIR CLEANER KN

- Adjustable and Accurate Air Speed Level:**
 Air speed can be adjusted between 0-100% with 1% units from the LCD screen.
- No Money Wasted on Replacement of Filters:**
 Using very sensitive air speed sensor and timer alerts to replace filters when necessary. No more replacement of filters before they are filled up.
- Easy to operate:**
 Main service can be handled on the LCD screen through service menu. Replacement of the filters can be done by the users.

ORDER INFORMATION

- OOACEQ-02** Oosafe® Air Cleaner KN without initial filters
- OOACHF-01** HEPA Filter for Oosafe® Air Cleaner KN
- OOACCF-01** Canister Carbon Filter Set for Oosafe® Air Cleaner KN
- OOACPF-01** Main Prefilter for Oosafe® Air Cleaner KN
- OOACPF-02** Extra Prefilter for Oosafe® Air Cleaner KN (Optional)

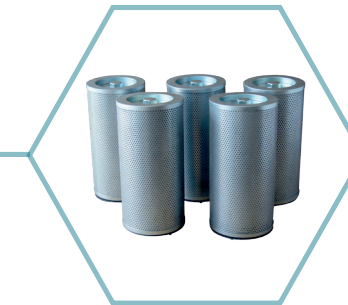

Oosafe® Air Cleaner KN including initial filter set
 Product code:
OOACEQ-01

TECHNICAL DATA	Dimensions	660x533x1640 (w x d x h, in mm)
	Air exchanges per hour (AEH)	9-28 times
	Weight (including filters)	77kg
	HEPA Filter efficiency (MPPS)	≥ 99.995%
	Total amount of activated carbon	9.4Kg

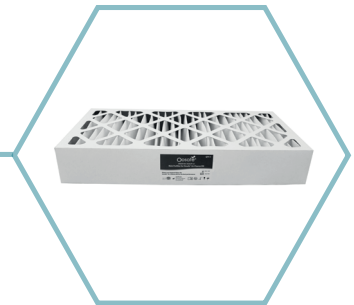

INITIAL FILTERS

HEPA Filter for Oosafe® Air Cleaner KN
 Product code:
OOACHF-01

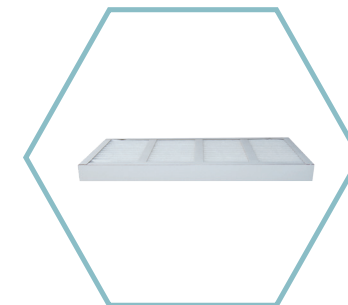

Canister Carbon Filter Set for Oosafe® Air Cleaner KN
 Product code:
OOACCF-01

Main Prefilter for Oosafe® Air Cleaner KN
 Product code:
OOACPF-01

OPTIONAL

Extra Prefilter for Oosafe® Air Cleaner KN
 Product code:
OOACPF-02
