

End cap installation guide for Easy 1 series

Easy 1 channels come with one universal end cap for both sides. Each side has its own set of instructions for proper installation.

Male Connection Side

1 Make sure arms of end cap face inwards

2 Slide end cap from bottom upwards

3 End cap arms should clip on inserts.

Female Connection Side

1 Cut arms from end cap

2 Slide end cap from top downwards

3 End cap shoulders should clip over protruding connection

Why Vodaland?

At Vodaland we pride ourselves in our dedication to customer service and unique benefits that our competition can't match. We have removed the middleman and instead sell as a supplier directly to clients ourselves. As well, we keep all our products in stock and our location in Mississauga, Ontario. This results in having the lowest prices and fastest delivery times in the industry. Additionally, we can provide assistance to our customers throughout the entire process including designing system layouts, installation guidance, and much more!
