

REX

Mobile Stretcher optimized for Correctional Facilities

Allows a Single Officer to
Quickly and Easily Move Any Patient.

A true force multiplier for CERT/SORT operations.

The ideal solution for jail-based emergency response teams tasked with inmate movement. If you move inmates, you need REX. Committing multiple resources to move a single inmate is a practice of the past. REX provides simple, safe and rapid movement of inmates while freeing up resources for other operations. REX - A true force multiplier.

Effortless Patient Movement
Over Virtually Any Terrain.

Maintains a 6' safe and social distance

Multiple Applications

Infirmiry operations

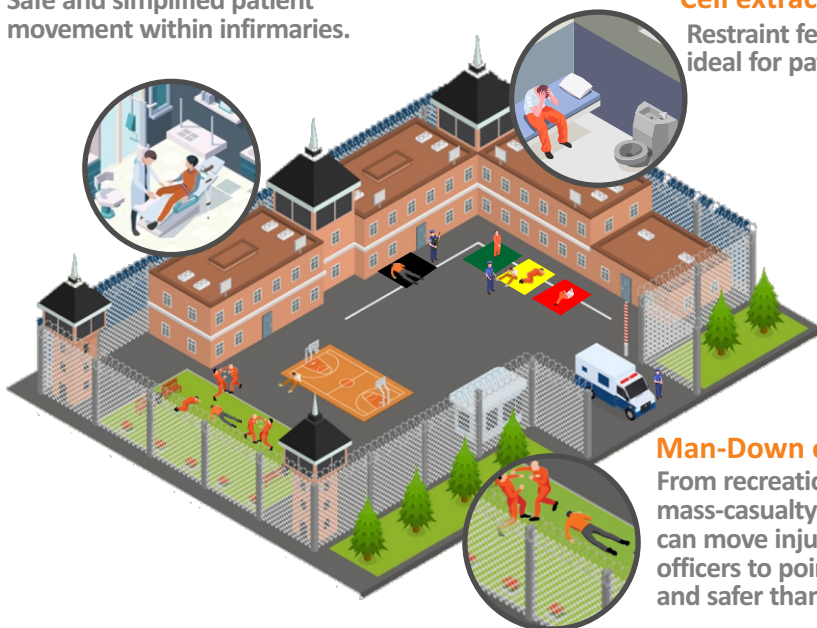

Safe and simplified patient movement within infirmaries.

Cell extraction operations

Restraint features makes Rex ideal for patient transport.

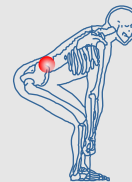

Man-Down operations

From recreational injuries to mass-casualty incidents, Rex can move injured inmates or officers to points of care faster and safer than other devices.

Extracts injured officers from high-threat areas quickly.

Injury Mitigation

Minimizes lifting
injury risk to staff.

Unlike backboards or cumbersome wheelchair loading, the Rex's low profile simplifies patient loading and eliminates all strain during the patient movement process.
