

YES[®] VM Vaginal Moisturiser Study Results

A recent post-market clinical follow-up study identified that:

- Before using YES[®] VM 93% of patients surveyed reported they experienced moderate to severe symptoms of vaginal dryness.
- 85% of patients reported relief from their vaginal dryness symptoms within 1 hour.
- More than half (68%) reported symptom relief within 1 to 10 minutes.

- Following use of YES[®] VM 69% of patients felt their symptoms had resolved or much improved.
- Data from HCPs validates the long-lasting effect of YES[®] VM reported by patients

- 94% of patients reported that applicators allow hygienic delivery of the right amount of moisturising gel inside the vagina.
- 98% of respondents would recommend YES[®] VM to others with vaginal dryness.
