USM Haller E

Application Options

A modular structure of your design, either completely or partially equipped with e-Balls and e-Tubes, is connected to a source of electricity. The structure itself conducts the low voltage electricity to the desired location using the e-Balls, e-Connectors and e-Tubes to form a circuit. USB chargers or light sources can be snapped into place in pre-cut recesses. The power supply is drawn from any point near the ground. The power supply cable is attached to a Haller e-Ball, and the power adapter is subsequently tucked underneath the furniture until only the operating switch remains visible. From this point the power supply requires no further cables but rather is integrated into the structure of the furniture.

1. Glass Panel
   - Glass elements can be illuminated throughout.

2. Without Metal Paneling
   - Compartments without metal paneling can be completely illuminated.

3. With Metal Paneling
   - Compartments with metal paneling can be illuminated from the front.

4. Compartment with an Extension Shelf
   - The entire compartment with an extension shelf can be illuminated.

5. Drop-Down and Extension Door
   - Via the “Light When Compartment Is Open” function, the light automatically turns on when the door is opened.

6. Angled Shelf
   - The presentation space is illuminated from the front.

7. Floor Lighting
   - The light shines at a 25-degree angle under the furniture.

8. Ambient Lighting
   - The light is directed vertically towards the back, illuminating the surroundings with a warm glow.

9. e-USB Charger
   - Provides a voltage of 5 volts to the connected device. (Capacity: 6.5 W)

10. e-Dummy
    - Sleek, black e-Dummy element close recesses that are still unutilised.
    - If a piece of furniture should later be supplemented with additional light, using e-Tubes (consuming), which are first equipped with e-Dummy elements, is recommended.

11. e-USB (power outlet)
    - Tubes with recesses for e-Lights, e-USB chargers or e-Dummy elements that can be easily snapped into place or replaced.

12. e-Ball, e-Connector
    - To enable the flow of electricity, the ball and connector were refined. The exterior dimensions remain unchanged.
    - The distinguishing feature of the ball is the black insulation ring.

13. e-Power Supply
    - Includes dimmer at the operating switch. Transforms the power supply voltage to 24 volts. (Capacity: 60 W)
    - Engineered & Made in Switzerland.

14. "e-Lights"
    - Dimmable, available in:
      - Warm white 2700 Kelvin
      - Cold white 5700 Kelvin
    - Both with or without the “light at compartment opening” function.

15. "e-Dummy"
    - Sleek, black e-Dummy element close recesses that are still unutilised.
    - If a piece of furniture should later be supplemented with additional light, using e-Tubes (consuming), which are first equipped with e-Dummy elements, is recommended.

16. "e-Tube (power outlet)"
    - Tubes with recesses for e-Lights, e-USB chargers or e-Dummy elements that can be easily snapped into place or replaced.

17. "e-Tube (conductive)"
    - The conductive e-Tube serves to conduct the electricity if no inserts are desired in this location. It is available in lengths of 30", 20", 16", 14", 10" and 7".

18. "e-Ball, e-Connector"
    - To enable the flow of electricity, the ball and connector were refined. The exterior dimensions remain unchanged.
    - The distinguishing feature of the ball is the black insulation ring.

USM Haller E - A modular structure of your design, either completely or partially equipped with e-Balls and e-Tubes, is connected to a source of electricity.
USM Haller Table

Designed more than 55 years ago, the USM Haller Table still embodies timeless elegance. Its clean lines perfectly harmonise with the modular furniture system of the same name.

---

**Accessories for all USM Haller Desks**

1. **Grommet hatch for network access**
   - Flush hinged cover set into the tabletop for easy network access, can be positioned right or left.

2. **Cable management**
   - For the Advanced table type, a cable tray integrated under the tabletop offers storage room and attachment options for all cables and technical components.
   - For the traditional USM Haller Table and the USM Haller Plus, a cable basket can be added.

3. **Cable duct**
   - The classic USM Haller table can be updated with a black aluminum cable duct section, with lids that fold open on both sides, to integrate cables. This enables the table depths to be expanded to the EU standard of more than 30". Available for the following table sizes: 79"W, 69"W, 59"W, 49"W, 39"W, 35"W, 30"W.

4. **CPU holder**
   - Computers in various sizes can be mounted using a simple holding device under the table.

5. **Link chain**
   - Holds and directs cables to the power source. Flexible and adjustable to various lengths.

6. **Flat screen pivot arm**
   - Screens are screwed to the height adjustable pivot arm using a mounting plate (VESA standard). Available for USM Haller classic desk. The pivot arm can be mounted onto the table edges with the universal holder or into the table leg using an assembly tube. Available for USM Haller Plus and Advanced: The bracket can be connected directly to one of the adaptation points.

7. **Material tray**
   - Provides room for writing instruments and can be discreetly stowed under the tabletop.

8. **USM Privacy Panels**
   - Can be attached to the long side to ensure individuality and privacy for people working at tables configured as a block station, 14"H or 28"H. Available for the following table sizes: 120"W, 98"W, 80"W, 79"W, 69"W, 59"W, 49"W.

9. **Flat screen support bar**
   - The bracket is inserted into the adaptation points. Up to two screens (max. 2 × 26 pounds) can be attached using a mounting plate (VESA standard). Screens can be mounted at different heights; screws can be adjusted with ball points.

10. **USB adapter**
    - The adapter is suitable for USB 2.0 and 3.0 ports; it can easily be inserted into the adaptation point. Usable as power supply or for data transfer.

11. **Lamp peg**
    - An optional lamp peg for easy attachment of traditional table lamps. Electrification is possible through the adaptation point.

---

**Accessories for USM Haller Desk Plus / Advanced**

1. **Flat screen support bar fix**
   - Move forwards or backwards two notches at a time to adjust the viewing distance.

---

* Manual height adjustment with a removable handle.

* Note: These sizes are not yet included in the standard range.
USM Kitos M and E Desk

Each desk (except free-standing) of the USM Kitos M and E family offers integrated smart solutions for electrification.

Why USM Kitos M? The "M" in its name stands for mechanical spring loaded height adjustment, adjustment time approx. 1 sec, with zero energy consumption. This system is more than 10 times faster than the electronic equivalent and has an extremely long operating life.

Why USM Kitos E? Maximum functionality and captivating design – USM Kitos E unites all requirements in one modern workplace: continuous height adjustability and maximum stability. A distinction is made between fixed and motor-driven legs in the E1, E2 and E3 models.

Basic desk
- Integrated cable tray underneath the tabletop
- Sliding tabletop
- Extra size
- Side table
- Table sizes: 99"W, 70"W, 69"W, 63"W, 35"D
- Available for USM Kitos E/M Meeting
- Options
- Support bar
-for USM Kitos M Plus / E Plus

1. Grommet hatch for network access

- Flush-hinged cover set into the tabletop for easy network access, can be positioned at two different locations.

2. CPU holder

- Computers in various sizes can either be mounted using a simple holding device under the height-adjustable tabletop or attached to the table column.

3. Link chain

- Holds and directs cables to the power source. Flexible and adjustable to various lengths.

4. USM Privacy Panels

- Can be attached to the long side to ensure individuality and privacy for people working at tables configured as a block station or meeting.

5. Flat screen pivot arm

- Screens are screwed to the height-adjustable pivot arm using a mounting plate (VES M standard). Available for USM Kitos E/M desk. The pivot arm can be mounted onto the table edges with the universal holder.

6. Front panel

- A black mesh fabric attaches to the front under the tabletop. Available for the following table sizes: 99"W, 89"W, 70"W, 69"W, 63"W.

7. Material tray

- Provides room for writing instruments and can be discreetly stored under the tabletop.

8. Flat screen support bar

- The bracket is inserted into the adaptation points.
- Up to two screens (max. 2 × 26 pounds) can be attached using a mounting plate (VES M standard).

9. Lamp peg

- An optional lamp peg for easy attachment of traditional table lamps. Electrification is possible through the adaption point.

10. Lamp support bar

- Move forwards or backwards 2 notches at a time to adjust the viewing distance.

** Available with or without middle traverse.
* Available with or without middle traverse.

The table can also be provided with an asymmetrical middle traverse. (This is not possible with the USM Kitos E-M Meeting.)
1 Metal, magnetic bookend
Available in light grey and graphite black.

2 Material tray
Provides room for writing instruments and can be discreetly stored under the tabletop.

3 USM Inos internal organization
Plastic box in metal frame: Perfect for keeping small bits and pieces organized – be it in your home office or anywhere else in your house.

4 USM Inos C4 box set
Includes box set fits into any piece of USM furniture. Available in light grey and graphite black.

5 USM Inos Felt Box
The new USM Inos Boxes organize, store and protect both your treasures and everyday paraphernalia of life. Several boxes can be stacked on top of each other with the help of trays, which can also be used as covers or serving trays, or to hold assorted small items around the home. These soft storage boxes made of nonwoven polyester are available in four different sizes and in light grey and anthracite grey.

6 World of Plants
Plants improve the indoor climate and thus our working environment. With USM’s worlds of plants, lively evergreen landscapes can now be easily integrated into the structure of USM Haller.
