Like all new developments from USM, the world of plants can easily be integrated into USM Haller at any time and adapted by the user according to his requirements.

Easy upgrade with LED lights

In combination with USM Haller E the scope of application for the world of plants gets even bigger and more tempting. Dimming the light and selectively illuminating the green splendour in a public or office space, creates an intimate and warm atmosphere, allowing to pause for a moment before the next meeting. As a result, the addition of USM Haller E not only offers plants constant lighting conditions according to their needs but opens up unlimited design options for the user.

Plants make people happy.

Metal plant panels

Metal plant panels with circular recesses and protective rings to hold the pots. Available in five sizes and 14 USM colors each.

Pot

Made in Germany from ceramic clay mixture. Available in one standard size in the colors Terracotta and Basalt.

Ø edge: approx. 220 mm
Ø bottom: approx. 133 mm
H 200 mm

Pot insert

Water level indicator

With the watering set, consisting of a pot insert and water level indicator, the product does not only appeal to plant lovers. The set supports you by regulating and extending the pouring cycle. The water level indicator tells you how much water needs to be poured. Thus the watering set offers the customer simplicity when it comes to caring for the plants.

Components
Plants make people happy. We are huge believers that spaces filled with greenery are the best places to work, live and read in. People in contemporary society spend 80 to 90% of their time indoors every day. So it only makes sense that we surround ourselves with them – because plants can have an amazing impact on our wellbeing.

USM now offers an elegant and simple system to incorporate more plants into your office, home or public spaces – for plant enthusiasts and those who would like to become one. Employees in generously landscaped offices are less ill. Plants contribute to the purification of indoor air and simultaneously release oxygen.

Work-life Balance
In the open office or coworking areas, USM Haller furniture with integrated plants can create a peaceful oasis in your working environment. In the lounge area, create a true social space. In both cases, reduced stress levels and increased productivity.

Welcome your guests with a friendly atmosphere.

In the open-office area or in the lounge, your USM Haller furniture can create a private space with integrated plants that are both elegant and practical. In the open office, plants can be used as a privacy divider. In the lounge, they create a green oasis.

Public spaces: friendly and welcoming atmosphere
In public spaces, the world of plants can be integrated in restaurants to create a cozy nook, set accents, or allow for privacy, selectively in museum shops next to postcards and accessories displays, or as a green welcoming reception in hospitals. If you care well for your plants, then your plants will also care for you.

Bring nature into your home
This simple and elegant system is perfect for the home to create a green oasis in the living room or an eye catcher, in form of an herb trolley, in the kitchen. By using USM Haller E, subdued lighting conditions contribute to a quiet retreat to meditate and relax, allowing the user to settle down from a hectic everyday life.

**Work-life Balance**

In the open office or coworking areas, USM Haller furniture with integrated plants can be used as a privacy divider between workplaces or to structure rooms. In the lounge space, it creates a retreat, inviting employees to get together and take a short break. Welcome your guests with a friendly atmosphere.

Plants can minimize our stress level and increase the output of productive work.
