EXTRU[®] LUPINS

QUALITY PROTEIN

QUALITY PROTEIN

Quality protein, containing essential amino acids, is required to develop strong, lean muscle mass and healthy body tissue. Containing 31% protein, EXTRU[®] LUPINS is the ideal choice for increasing the protein intake of horses of any age and activity level.

ENHANCED DIGESTIVE SUPPORT

EXTRU[®] LUPINS are processed using steam extrusion technology, utilising heat and pressure to improve digestibility and palatability. As a low starch feed, EXTRU[®] LUPINS are the ideal choice to support overall digestive health.

LOW IN STARCH

EXTRU[®] LUPINS are naturally very low in starch, making it the safe choice for horses requiring additional protein or energy, particularly those sensitive to grain or prone to laminitis.

HOOF AND COAT HEALTH

EXTRU[®] LUPINS are naturally high in biotin and contain added oil, essential in maintaining strong hooves, healthy skin and coat shine.

ANALYSIS AS FED (PER 1KG)

DIGESTIBLE ENERGY (DE)	13 MJ	Lysine	14.2 g
CRUDE PROTEIN	31 %	Calcium	21 g
CRUDE FAT	7.5 %	Phosphorous	29 g
CRUDE FIBRE (MAX)	14 %	Sodium	0.3 g
STARCH	2 %	Biotin	680 µg

INGREDIENTS

Lupins, Canola Oil & Rice Bran Oil.

FEEDING GUIDE (PER DAY)

The quantity of EXTRU[®] LUPINS provided can be adjusted depending on desired condition and energy level of the horse. Designed to be fed in conjunction with a MITAVITE[®] fully fortified feed.

IF FEEDING BY DIPPER Replace 1 dipper of raw, rolled or cracked grains with one 1 dipper of EXTRU[®] LUPINS.

IF FEEDING BY WEIGHT When changing from raw to EXTRU[®] LUPINS grains reduce the weight fed by 30%.

Roughage (pasture, hay, chaff, beet pulp etc.) should be fed at a minimum of 1.5-2% of bodyweight. Total daily feed (hard feed + roughage) should be 2-3% of bodyweight depending on age, workload & climate. Feeding rates intended as a guide only. All variables should be taken into consideration.
