XTRA COOL®

VERSATILE HIGH FIBRE,
LOW STARCH NUTRITION

BALANCED NUTRIENT PROFILE

XTRA COOL® is fortified with a premium blend of vitamins and chelated minerals to meet the nutritional requirements of a wide range of horses and activity levels, ranging from pleasure to performance. Fed in conjunction with roughage, you can trust XTRA COOL® to provide your horse with its daily nutrient requirements.

ENHANCED DIGESTIVE SUPPORT

XTRA COOL® is produced using steam extrusion technology which utilises heat and pressure to reconfigure starch molecules (gelatinisation). Starch gelatinisation significantly increases grain digestibility and nutrient utilisation within the small intestine, thereby reducing the burden on the hindgut and minimising risk of dietary induced disturbance. High fibre content supports natural digestive function and hindgut health.

HIGH FIBRE, LOW STARCH

The balanced formula of XTRA COOL® incorporates highly digestible fibre, oil and controlled starch levels to create the ultimate cool conditioning feed. XTRA COOL® is the ideal choice for a wide range of horses and ponies that require the nutritional support of a balanced feed without the heating effect.

SUITABLE FOR ALL AGES AND DISCIPLINES

XTRA COOL® is suitable for a wide range of horses and ponies, helping to simplify feed time. Providing conditioning ingredients, coupled with quality nutrients, XTRA COOL® maintains optimal condition whilst supporting the health and wellbeing of your horse or pony.
