Details	
Details Target Description	Endophilin-A2, SH3 domain protein 2B or SH3 Domain-Containing GRB2-Like Protein 1 is encoded by the gene Sh3gl1 and a member of the endophilin family of Src homology 3 domain-containing proteins. Endophilin-A2 is involved in endocytosis and is thought to recruit other proteins to the membrane. Endophilin-A2 may also play a role in the cell cycle. Endophilin-A2 is expressed ubiquitously in tissues. Diseases associated with SH3GL1 include Leukemia and Acute Myeloid Leukemia.
