## Details

<b>Target Description</b>	Protocadherin Gamma Subfamily B, 2 is encoded by the gene PCDHGB2. PCDHGB2 is a member of the protocadherin gamma gene cluster. PCDHGB2 is a neural cadherin-like cell adhesion protein that most likely plays a critical role in the establishment and function of specific cell-cell connections in the brain. PCDHGB2 is expressed in the nervous system. Diseases associated with PCDHGB2 include Prune Belly Syndrome.
<b>Specificity</b>	No cross-reactivity against other Gamma-protocadherin-A, -B or -C proteins
<b>Purification Method</b>	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
<b>Quality Control Tests</b>	Each new lot of antibody is quality control tested on cells overexpressing target protein and confirmed to give the expected staining pattern.
<b>Storage</b>	Aliquot and store at ≤ -20°C for long term storage. For short term storage, store at 2-8°C. For maximum recovery of product, centrifuge the vial prior to removing the cap.
