## Details

<b>Target Description</b>	Zinc finger protein 746, Parkin-Interacting Substrate or PARIS/ZNF746 is encoded by the gene ZNF746. PARIS is a transcription repressor that binds to a consensus sequence on promoters and represses the expression of a transcriptional coactivator, PGC-1-alpha (PPARGC1A). This protein plays a role in regulation of neuron death. PARIS is found in the cytoplasm and nucleus
<b>Specificity</b>	Does not cross-react with ZNF783 or ZNF398
<b>Purification Method</b>	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
<b>Quality Control Tests</b>	Each new lot of antibody is quality control tested by western blot on rat whole brain lysate and confirmed to stain the expected molecular weight band.
<b>Storage</b>	Aliquot and store at ≤ -20°C for long term storage. For short term storage, store at 2-8°C. For maximum recovery of product, centrifuge the vial prior to removing the cap.
