Target Description	Zinc finger protein 746, Parkin-Interacting Substrate or PARIS/ZNF746 is encoded by the gene ZNF746. PARIS is a transcription repressor that binds to a consensus sequence on promoters and represses the expression of a transcriptional coactivator, PGC-1-alpha (PPARGC1A). This protein plays a role in regulation of neuron death. PARIS is found in the cytoplasm and nucleus
Specificity	Does not cross-react with ZNF783 or ZNF398
Purification Method	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
Quality Control Tests	Each new lot of antibody is quality control tested by western blot on rat whole brain lysate and confirmed to stain the expected molecular weight band.
Storage	Aliquot and store at ≤ -20°C for long term storage. For short term storage, store at 2-8°C. For maximum recovery of product, centrifuge the vial prior to removing the cap.
