## **Product Datasheet**

## Anti-Dicer Antibody FL650 Conjugate

KO Validated

## Overview

| Catalog #                         | 75-196-FL650  |
|-----------------------------------|---|
| Conjugate                         | FL650 Ex: 655 nm, Em: 676 nm  |
| lsotype                           | lgG1  |
| Clone Number                      | N167/7  |
| Size                              | 200 μL  |
| Concentration                     | 0.5 mg/mL   |
| Host Species                      | Mouse Monoclonal  |
| Format                            | Purified by Protein A chromatography  |
| Buffer                            | PBS with 0.09% azide  |
| Applications                      | ICC, IHC  |
| Species Reactivity                | Human, Mouse, and Rat   |
| Immunogen                         | Fusion protein amino acids 1638-1899 of mouse Endoribonuclease Dicer (accession number<br>Q8R418) produced recombinantly in E. Coli   |
| Molecular Weight                  | 215 kDa   |
| Cite this Antibody                | Antibodies Inc Cat# 75-196-FL650, RRID: AB_2939727  |
|                                   |   |
|                                   |   |
| Details                           |   |
| Details<br>Target Description     | Endoribonuclease Dicer or Dicer 1, Ribonuclease III is encoded by the gene DICER1. DICER1 acts as a double stranded (ds) ribonuclease and plays a role in short post transcriptional gene silencing. DICER1 cleaves full length dsRNA and miRNA into smaller moleclues 21-23 nucleotides in length, called siRNAs and microRNAs. Dicer1 is expressed in a variety of tissues, including brain. Diseases associated with this gene include Pleuropulmonary Blastoma, Glow Syndrome and Wilms Tumor.  |
|                                   | double stranded (ds) ribonuclease and plays a role in short post transcriptional gene silencing.<br>DICER1 cleaves full length dsRNA and miRNA into smaller moleclues 21-23 nucleotides in length,<br>called siRNAs and microRNAs. | Target Description<br>Specificity | <ul> <li>double stranded (ds) ribonuclease and plays a role in short post transcriptional gene silencing.</li> <li>DICER1 cleaves full length dsRNA and miRNA into smaller moleclues 21-23 nucleotides in length, called siRNAs and microRNAs. Dicer1 is expressed in a variety of tissues, including brain. Diseases associated with this gene include Pleuropulmonary Blastoma, Glow Syndrome and Wilms Tumor.</li> <li>No cross-reactivity reported</li> <li>Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity</li> </ul> |

## **Our Guarantee**

As an original manufacturer, we are dedicated to creating quality and reproducible antibodies that further your research. We provide personalized customer support from the scientists that made the antibody and offer a free replacement or 100% refund if we cannot resolve an issue. Order today and experience our 50+ year passion for science.

Note: For research use only. Not intended for therapeutic or diagnostic use. Use of all products is subject to our terms and conditions, viewable on our website.
