## **Details**

**Target Description** Phytanoyl-CoA 2-Hydroxylase is encoded by the gene PHYH. PHYH is a member of the PhyH family.

PHYH is a peroxisomal protein that converts phytanoyl-CoA to 2-hydroxyphytanoyl-CoA. PHYH is expressed in the liver, kidney, and T-cells. Diseases associated with PHYH include Refsum Disease,

Classic and Retinitis Pigmentosa.

**Specificity** No cross-reactivity reported

**Purification Method** Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity

chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.

Quality Control Tests Each new lot of antibody is quality control tested by western blot on rat whole brain lysate and

confirmed to stain the expected molecular weight band.

**Storage** Aliquot and store at  $\leq$  -20°C for long term storage. For short term storage, store at 2-8°C. For

maximum recovery of product, centrifuge the vial prior to removing the cap.
