#### **Details**

**Target Description** Rho GTPase-activating protein p115 or ARHGAP4 is encoded by the gene ARHGAP4 and is a

member of the RHO GTPase-activating proteins (rhoGAP) family of proteins. These proteins play a role in the regulation of small GTP-binding proteins belonging to the RAS superfamily. ARHGAP4 is thought to be involved in axonal outgrowth and the regulation of cell motility. Diseases associated

with this gene include types of Diabetes.

**Specificity** Does not cross-react with FNBP2

**Purification Method** Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity

chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.

Quality Control Tests Each new lot of antibody is quality control tested by IHC on either rat or mouse brain and

confirmed to give the expected staining pattern.

**Storage** Aliquot and store at  $\leq$  -20°C for long term storage. For short term storage, store at 2-8°C. For

maximum recovery of product, centrifuge the vial prior to removing the cap.
