Details

Target Description	Synaptotagmins are a family of calcium sensing, membrane trafficking proteins. 17 different synaptotagmins have been identified in mammals. Along with synaptotagmins 1 and 2, synaptotagmin 5 (also known as synaptotagmin 9) has been shown to function as a Ca ²⁺ sensor for fast synchronous neurotransmitter release (Xu J et al., 2007).
Specificity	Does not cross-react with Synaptotagmin-10 (or other Synaptotagmins)
Purification Method	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
Quality Control Tests	Each new lot of antibody is quality control tested on cells overexpressing target protein and confirmed to give the expected staining pattern.
Storage	Aliquot and store at $\leq -20^{\circ}\text{C}$ for long term storage. For short term storage, store at 2-8 $^{\circ}\text{C}$. For maximum recovery of product, centrifuge the vial prior to removing the cap.
