Details

Target Description	Amphoterin-induced protein 1, amphoterin-induced gene and open reading frame, Adhesion Molecule With Ig Like Domain 1 or Amigo-1 is encoded by the gene AMIGO1 and is a member of the AMIGO family. Amigo1 acts as a neuronal adhesion protein and contains leucine-rich repeat and immunoglobulin domains. It is thought to play a role in cell to cell interactions and in neuronal plasticity/regeneration. Amigo1 is expressed in the nervous system and at low levels in liver, kidney, spleen, lung and heart.
Specificity	No cross-reactivity reported
Purification Method	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
Quality Control Tests	Each new lot of antibody is quality control tested by western blot on rat whole brain lysate and confirmed to stain the expected molecular weight band.
