Details

Target Description	Synaptic vesicle 2-related protein or SVOP is encoded by the gene SVOP. SVOP contains 12 transmembrane regions and has transporter and ion transmembrane transporter activity. SVOP is expressed early in development and expressed in brain and endocrine cells where it is found in synaptic vesicles and microvesicles. Diseases associated with SVOP include Intestinal Botulism and Familial Atrial Fibrillation.
Specificity	Does not cross-react with SVOPL/SVOP2
Purification Method	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
Quality Control Tests	Each new lot of antibody is quality control tested by western blot on rat whole brain lysate and confirmed to stain the expected molecular weight band.

Storage
