## **Product Datasheet**

## Anti-Ankyrin-R/G Antibody FL594 Conjugate

## Overview

<b>.</b> . <b>.</b>	
Catalog #	75-415-FL594
Conjugate	FL594 Ex: 594 nm, Em: 615 nm
Isotype	lgG2b
Clone Number	N388A/27
Size	200 μL
Concentration	0.5 mg/mL
Host Species	Mouse Monoclonal
Format	Purified by Protein A chromatography
Buffer	PBS with 0.09% azide
Applications	ICC, IHC
Species Reactivity	Human, Mouse, and Rat
Immunogen	Fusion protein amino acids 1-1881 (full-length) of human Ankyrin-R (accession number P16157) produced recombinantly in E. Coli
Molecular Weight	200 kDa
Cite this Antibody	Antibodies Inc Cat# 75-415-FL594, RRID: AB_2940378
Details	
Details Target Description	Ankyrins are scaffold proteins that function to link proteins that mediate the attachment of integral membrane proteins to the spectrin-actin based membrane cytoskeleton. In this manner, ankyrin family proteins play key roles in various processes including cell motility, activation, proliferation, contact and the maintenance of specialized membrane domains.
	Ankyrins are scaffold proteins that function to link proteins that mediate the attachment of integral membrane proteins to the spectrin-actin based membrane cytoskeleton. In this manner, ankyrin family proteins play key roles in various processes including cell motility, activation, proliferation,
Target Description	Ankyrins are scaffold proteins that function to link proteins that mediate the attachment of integral membrane proteins to the spectrin-actin based membrane cytoskeleton. In this manner, ankyrin family proteins play key roles in various processes including cell motility, activation, proliferation, contact and the maintenance of specialized membrane domains.
Target Description Specificity	Ankyrins are scaffold proteins that function to link proteins that mediate the attachment of integral membrane proteins to the spectrin-actin based membrane cytoskeleton. In this manner, ankyrin family proteins play key roles in various processes including cell motility, activation, proliferation, contact and the maintenance of specialized membrane domains. Does not cross-react with Ankyrin-BCross-reacts with Ankyrin-G Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity

## **Our Guarantee**

As an original manufacturer, we are dedicated to creating quality and reproducible antibodies that further your research. We provide personalized customer support from the scientists that made the antibody and offer a free replacement or 100% refund if we cannot resolve an issue. Order today and experience our 50+ year passion for science.

Note: For research use only. Not intended for therapeutic or diagnostic use. Use of all products is subject to our terms and conditions, viewable on our website.
