Details

Target Description	RGS14 is a member of the RGS family (regulator of G-protein signaling) and is highly expressed in the prefrontal cortex. Hallmark domains of RGS14 include a RGS domain, two Raf-like Ras-binding domains and a GoLoco motif. RGS14 inactivates G protein α subunits. This protein has been implicated in Schizophrenia and Alzheimer's disease.
Specificity	Does not cross-react with RGS12
Purification Method	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
Quality Control Tests	Each new lot of antibody is quality control tested by IHC on either rat or mouse brain and confirmed to give the expected staining pattern.
Storage	Aliquot and store at $\leq -20^{\circ}\text{C}$ for long term storage. For short term storage, store at 2-8 $^{\circ}\text{C}$. For maximum recovery of product, centrifuge the vial prior to removing the cap.
