Product Datasheet

Anti-AGPS Neo-Epitope Antibody FL550 Conjugate

Overview

Catalog #	75-434-FL550
Conjugate	FL550 Ex: 550 nm, Em: 575 nm
Isotype	lgG1
Clone Number	N444/63
Size	200 μL
Concentration	0.5 mg/mL
Host Species	Mouse Monoclonal
Format	Purified by Protein A chromatography
Buffer	PBS with 0.09% azide
Applications	ICC, IHC
Species Reactivity	Human, Mouse, and Rat
Immunogen	Synthetic peptide amino acids 59-67 (KARRAASAA, site of proteolytic processing for peroxisome import) of human AGPS (accession number O00116)
Molecular Weight	66 kDa processed (vs. 72 kDa unprocessed)
Cite this Antibody	Antibodies Inc Cat# 75-434-FL550, RRID: AB_2940445
Details	
Target Description	Alkyldihydroxyacetonephosphate synthase, peroxisomal or AGPS neo-epitope is encoded by the gene AGPS. AGPS is a member of the FAD-binding oxidoreductase/transferase type 4 family and is an enzyme involved in ether lipid biosynthesis. Diseases associated with this gene include forms of Rhizomelic Chondrodysplasia Punctata.
Specificity	Does not cross-react with unprocessed AGPS
Purification Method	Produced by in vitro bioreactor culture of hybridoma line followed by Protein A affinity chromatography and conjugation of purified mAb. Purified mAbs are >90% specific antibody.
Quality Control Tests	Each new lot of antibody is quality control tested by western blot on rat whole brain lysate and confirmed to stain the expected molecular weight band.
	commed to stain the expected molecular weight band.

Our Guarantee

As an original manufacturer, we are dedicated to creating quality and reproducible antibodies that further your research. We provide personalized customer support from the scientists that made the antibody and offer a free replacement or 100% refund if we cannot resolve an issue. Order today and experience our 50+ year passion for science.

Note: For research use only. Not intended for therapeutic or diagnostic use. Use of all products is subject to our terms and conditions, viewable on our website.
