## **Product Datasheet**

# Anti-Kv9.1 Antibody FL550 Conjugate

### Overview

<b>A</b> · <b>I</b> · ·	
Catalog #	75-450-FL550
Conjugate	FL550 Ex: 550 nm, Em: 575 nm
Isotype	lgG2b
Clone Number	N461/19
Size	200 μL
Concentration	0.5 mg/mL
Host Species	Mouse Monoclonal
Format	Purified by Protein A chromatography
Buffer	PBS with 0.09% azide
Applications	ICC
Species Reactivity	Mouse and Rat
Immunogen	Fusion protein amino acids 1-186 (cytoplasmic N-terminus) of mouse Kv9.1 (accession number O35173) produced recombinantly in E. Coli
Molecular Weight	60-80 kDa
Cite this Antibody	Antibodies Inc Cat# 75-450-FL550, RRID: AB_2940497
Dataila	
Details	
Details Target Description	Potassium voltage-gated channel modifier subfamily S member 1 is encoded by the gene KCNS1. KCNS1 is a member of the potassium channel family, S (TC 1.A.1.2) subfamily, Kv9.1/KCNS1 sub- subfamily. KCNS1 is a potassium channel subunit that does not form functional channels by itself. It can form heterotetrameric channels with KCNB1 and KCNB2. KCNS1 modulates the delayed rectifier voltage-gated potassium channel activation and deactivation rates of KCNB1 and KCNB2. KCNS1 is expressed in the brain. Diseases associated with KCNS1 include epileptic encephalopathy, early infantile, 7.

### Storage

Aliquot and store at  $\leq$  -20°C for long term storage. For short term storage, store at 2-8°C. For maximum recovery of product, centrifuge the vial prior to removing the cap.

#### **Our Guarantee**

As an original manufacturer, we are dedicated to creating quality and reproducible antibodies that further your research. We provide personalized customer support from the scientists that made the antibody and offer a free replacement or 100% refund if we cannot resolve an issue. Order today and experience our 50+ year passion for science.

Note: For research use only. Not intended for therapeutic or diagnostic use. Use of all products is subject to our terms and conditions, viewable on our website.
