APO Active 3™ - FITC

Antibody Specific Active Caspase 3 Detection Kit

Description

Antibody Specific Active Caspase 3 Fluorescein Isothiocyanate (FITC) Detection Kit is highly specific for active human and murine. The kit utilizes a rabbit affinity purified polyclonal antibody against aa 163-175.

Cross reactivity: Human, Mouse, and Rat.

Product Specifications

Kit Components:

1. One vial of affinity purified Caspase 3 polyclonal antibody (Part 1002)
2. One vial of FITC labeled affinity purified goat x rabbit polyclonal antibody (Part 2002)
3. One vial of 10x fixative (Part 3001)

Application:	Flow Cytometry, Fluorescence Microscope, Fluorescence Plate Reader
Shipping:	SHIPPED ON BLUE ICE
Long Term Storage:	Store contents as labeled
Upon Arrival:	2-8° C
