

PRODUCT DATA SHEET

Mito Flow™

Mitochondria Membrane Potential Detection Kit

Description

Cell Technology's Mito Flow assay utilizes a cationic dye to visualize mitochondrial membrane potential. The Mito Flow reagent is a cell permeable cationic dye that has a strong fluorescent signal and exhibits low membrane potential independent (non specific) binding and toxicity.

Product Specifications

Kit Components:

1. Mito Flow Dye (Part # 4004)
2. 10x Dilution Buffer (Part # 3004)

Application:	Flow Cytometer
Shipping:	SHIPPED ON BLUE ICE
Long Term Storage:	Store contents as labeled
Upon Arrival:	2-8° C

Catalog Number/Sizes

Catalog #	Size (tests)
FLO200-2	100
FLO200-3	500

Rev.: 01/2011
