FC-5440 DOUBLE ROCKER SWITCH

The FC-5440 is a his and her rocker on/off switch. This unit allows 2 switch locations on a headboard to control the light fixture. The unit is heavy duty with grounded connections for commercial or residential environment.

The power cord is 10 ft. and grounded right angle plug. The cord between the 2 switches is 12 ft. to allow for use on the largest bed possible. The exit cord for light fixtures is a 30" grounded connection with 2.5 amp rating. See below for cutout diameter design to go through 3/4" wood panel. We also have a grommet to decorate the cutout hole if desired (FC-805).
