

# Light Up Your Space

The FC-492 LED/ FC-493 LED puck light provides an even, warm light and adequate illumination for any work surface or display, all while consuming less energy than their halogen equivalents. The puck light provides task or accent illumination for indoor applications with 130 lumens. These LED lights can be surface-mounted or recessed. Surface mounting is achieved with the included mounting ring and recessed mounting with the pressure clips provided on the puck light.
