General rules when reporting frequencies are listed below:

- Percentages are not recommended if the number of subjects in the group is < 100 . Instead, ratios should be used (for example, 0.67 instead of 67%).
- Percentages should be presented as whole numbers, without decimals. The exception are percentages $< 10\%$, where one decimal place is allowed, only if necessary and applicable (for example, if percentage is 0.3%).
