

BENCH

F605 FID BENCH

DESCRIPTION

Utilizing our easy adjust ladder catch system, the user can choose from seven different positions, ranging from a -20° decline to an 85° upright position. The integrated lift handle and transport wheels allow for simple and easy maneuvering when relocating and storing the bench in an upright position.

The 3 point stance and rubber feet ensure that the bench will not rock. Additional attention to comfort, style, and accessory used gives this bench package a huge advantage over all others.

FEATURE

- Compact design can be stored upright when not in use
- Integrated lift handle and transport wheels for easy maneuvering
- Rock Solid 3-point stance with non-slip rubber feet keeps the bench in position
