

LAVA STONE

Made entirely from natural composites, lava stone is uniquely crafted from a mix of raw lava dust and a dune sand-based resin binder. A texturally porous material that can absorb moisture, lava stone surfaces are hand-polished and specially sealed with a protective polyurethane wax coating, for use indoors or out.

Care for Your Lava Stone Products

Preserve the unique character of lava stone with these care essentials:

- > Address spills immediately by wiping with a dry, soft cloth.
- > Spot-clean as needed with a soft cloth and mild soap.
- > Avoid chemical or bleach-based cleaning products, strong detergents and furniture polish, as abrasive ingredients can damage stone.
- > Use coasters, trivets and placemats for protection against wet or hot items.
- > Cover when not in use, as prolonged exposure to outdoor elements may cause surface warping or discoloration.
