

Live Fence Indicator

Fence Performance in a Flash

Live Fence Indicator G51100

Install at strategic locations for convenient visibility including driveways and near the home

High Visibility

LED flashes to indicate fence is working effectively. Is easily visible during day and night (up to 1km at night)

Low Voltage Cut Off

Will not flash if the fence voltage is too low

For instant reassurance that your fence is working.

Place permanently on your fence line and simply look for the flash when you pass by.

No batteries required. Uses power from the fence

Quick and Easy Installation

Place earth stake in the ground and simply clip onto fence wire or tape (up to 40mm width)

Long Life

Water and UV resistant
