how to install the plinth

1. Position the plinth on a **level surface** in its desired location. Ensure the front of the plinth is facing you, **the front will have the logo** on it (see image).
2. Following the safety guidance (below), with assistance if required, carefully move the HOTBIN into place on top of the plinth ensuring the **unit is aligned centrally inside** the plinth recess.

health and safety

For safety reasons, we recommend that the HOTBIN is **empty** before it is lifted onto the plinth.

The HOTBIN can be extremely heavy with waste inside. Think before you lift!

- Ask for help if you think you are going to find moving the HOTBIN difficult.
- Keep children and pets away while installing the plinth and moving the HOTBIN.
- **DO NOT** lift the plinth with the HOTBIN on top.
