

VERMONT NATURAL COATINGS®

PolyWhey®

Floor Finish or Furniture Finish?

Both our PolyWhey® Floor Finish and PolyWhey Furniture Finish meet the strictest environmental standards in the US and Canada, but there are some differences. Find out which of our products is best for your next project.

Contains UV protection

For interior use

Can be used over fully cured paint

Designed to flow across a horizontal surface

Recommended 3 coats of finish

Formulated for foot traffic to resist scuff and black heel mark

Contains UV protection

For interior use

Can be used over fully cured paint

Designed to adhere to horizontal + vertical surfaces

Recommended 3 coats of finish

Not intended to be walked on

Can I use Floor Finish on furniture?

Our PolyWhey Floor Finish can be a good option (though more robust than necessary) for bars, tabletops and other large horizontal surfaces. If your project involves vertical surfaces (like bookcases or chair legs), we recommend using the Furniture Finish for better vertical adhesion.

Is Floor Furniture more durable than Furniture Finish?

Our PolyWhey Floor Finish and Furniture Finish have similar durability when 3 coats of finish are applied. However, the Furniture Finish will not stand up to marks caused by foot traffic in the same way if used on floors.

Can I use Furniture Finish on floors?

Our PolyWhey Furniture Finish is not recommended for use on floors.
