

CON Premium Wall-Mounted Convection Heater

Description

CON Premium is suitable for use as a standalone heating system, or can be used in spring and autumn and as a booster heater in smaller rooms. The heater is operated using the programming unit, located at the top right front. The programming unit has an interactive display that allows access to advanced user features such as night mode operation, user-customized time programs, open window detection, and other convenience features. CON Premium has a frost protection setting; designed to maintain a room at above freezing temperatures. Overheat protection is built into the unit. The external casing of the appliance is made from thick, enameled aluminum. Color is Alpine White.

- › Advanced interactive display built into unit
- › Selectable temperature range from 41 °F – 86 °F
- › Draft free, silent operation
- › Frost protection setting
- › Three-year warranty

Applications

Ideal for:

- › Bathrooms
- › Bedrooms
- › Basements
- › Playrooms
- › 3-Season Porches
- › Cabins
- › Mobile Homes
- › Offices

Specification

Contractor shall supply and install Stiebel Eltron CON Premium electric heater(s) of the wattage and voltage specified on the plan. Heater(s) shall be surface-mounted fan-less convection type. Heater(s) shall have a body constructed of stove enameled sheet steel in Alpine White color. Heater(s) shall have a selectable temperature range of 41 °F to 86°F (5 °C to 30 °C), and a frost protection setting which switches on the heating element automatically if the room temperature drops below the frost protection temperature of 45 °F (5 °C). Heater(s) shall be operated using the programming unit, located at the top right front. Heater(s) programming unit shall have an interactive display that allows operation and access to advanced user features. Heater(s) shall be mounted with a minimum clearance from the finished floor and from the left and right sides of at least 4", a minimum clearance to the top of the heater of at least 10", and a minimum clearance to the back of the heater of at least 1". Heater(s) shall have an electrical cable entrance on the right side. Heater(s) shall be ETL listed to conform to ANSI/UL Std. 2021 and certified to CAN/CSA C22.2 No. 46.
