1. Adjust the seat post to the height needed. This is the height at which you can sit comfortably and pedal at the same time.

2. If the tube is pinched between the rim and the tire, the tube will pop and create a hole. Check your tires regularly and replace them if necessary.

3. Make sure that the battery has been fully charged before use, and remove it from the bike when not in use. Charge your battery when you get to an electrical outlet.

4. The E-Bike is able to sense your feet's force on the pedal to provide you with more power while pedaling. This feature will not work if there is any interference with the pedals or the battery.

5. Change the lubricating grease of the front axle, back shaft, and pivot once every 6 months. This will ensure the smooth operation of the bike.

6. You are able to adjust the amount of assistance on the LCD screen by adjusting the settings. This will allow you to control the bike's speed and power output.

7. Turn on only after you are ready to ride. The battery is sealed safely within the frame of the bike to ensure no damage can come to it.

8. Use hand signals to communicate with others on the road. It is important you learn them before riding on the road.

9. Adjust the saddle to fit your body size. Take heed of the maximum height markings.

10. When battery meter indicates low power remaining, switch to manual power and ride as you normally would.

11. When battery is run out completely, you can still pedal your e-bike to a full stop. Ride at a slower speed and try to be more visible.

12. Use reflective clothing and a helmet for your protection. You are required by law to wear a helmet while riding.

13. Read these instructions carefully before starting to assemble your bike. Unpacking: Carefully remove the bicycle from the box. Be sure to check that all quick releases are locked and in place.

14. There are two steps to assemble this. First, remove the handlebar stem from the bicycle. Second, install the handlebar and adjust it to the correct height.

15. Wheels should be checked and repaired regularly. The fitting of the tire bead and rim bead should be checked regularly.

16. Bulges, cracks, or general imperfections have it repaired immediately.

17. Your rims should always be smooth and without cracks. If there are any breaks, your bike should not be used.

18. Never attempt to open the Lithium battery in any way. If you are having any issues with your battery, please contact Customer Service.

19. Using your power source incorrectly or leaving the charger connected to the battery for extended periods of time may result in a fire.

20. The battery is sealed safely within the frame of the bike to ensure no damage can come to it.

21. Due to safety locks, you need to check that all quick releases are locked and in place before starting to ride.

22. Brake shoes should be checked frequently. If they are worn down, replace them immediately by an authorized dealer.

23. Brake lag might occur if the brakes are not engaged properly. Brake lag might be caused by wearing down of brake shoes or if the brakes are not adjusted correctly.

24. Pedaling during braking and coasting is allowed. However, you must pedal with the correct force level to avoid losing control of the bike.

25. Braking and coasting is allowed during riding uphill. Pedaling to supplement the battery power is necessary during strong winds.

26. Change the lubricating grease of the front axle, back shaft, and pivot once every 6 months. This will ensure the smooth operation of the bike.

27. Never attempt to open the Lithium battery in any way. If you are having any issues with your battery, please contact Customer Service.

28. Using your power source incorrectly or leaving the charger connected to the battery for extended periods of time may result in a fire.

29. The battery is sealed safely within the frame of the bike to ensure no damage can come to it.

30. Due to safety locks, you need to check that all quick releases are locked and in place before starting to ride.

31. Brake shoes should be checked frequently. If they are worn down, replace them immediately by an authorized dealer.
