

BIO
KATHY WEIGAND

A sixth generation Texan, Weigand was raised on a working farm and ranch with Hereford cattle and Quarter horses just outside Fredericksburg, and the western heritage & lifestyle is often reflected in her artwork.

An accomplished professional photographer, Weigand studied with some of the world's leading PPA Master photographers. Her prints have earned numerous awards on the state, regional, and international levels including several Professional Photographers of America (PPA) Loan Collection awards.

The PPA also awarded Weigand with the prestigious Master of Photography (M. Photog.) degree.

Kathy began studying oil painting in earnest a few years ago. While her extensive photography background and experiences have been a solid foundation for lighting and composition expressions, Weigand is mostly self-taught with oil painting techniques. She prefers working with a limited palette of oil colors, and enjoys seeing a blank canvas 'come to life' with values, colors, and shapes. Favorite subjects often include landscapes and wildlife of the American West, Native American, & the Texas Hill Country.

Weigand's work has been used in large corporate advertising, magazines, publications, marketing companies, & public displays.

Artwork has sold to collectors across the USA.
