3	8' lumber	72"		4	Height legs	<i>See NOTE: 3.</i>
Total # of Pieces				20		

NOTES - Follow all Safety and Assembly instructions for your Just Stack It! DIY Projects

1. Choose lumber without large knots or cracks which can weaken the lumber as these will be load bearing members in your platform.

2. We suggest you use Kiln Dried lumber to minimize warpage over time.

3. Height is determined by the user. Increasing Height may require securing the shelving to the wall to prevent tipping hazard.

4. Shelving can be cut from a 4'x8' sheet or purchased pre-cut in 2'x4' pieces for convenience. Shelving material is user choice.

5. Follow all Safety Instructions. Using power tools, loading and moving furniture and lumber, climbing in and out of trucks, and using ladders and ramps can be hazardous. Brackets can have sharp edges. Wear eye and hand protection and follow all tool and equipment warnings and instructions.
