

SS Series

AUTOMATED SCREEN WASHING/CLEANING MACHINES

Chemical Consultants, Inc. continues to lead the Screen Printing Industry in design and development of reclaiming equipment. The SS Series automated screen washers help shops achieve benefits in productivity and efficiencies, as well as, benefits in health and safety. They automatically remove the ink from your screens in less than 3 minutes. These proven screen washers feature heavy 14 gauge stainless steel construction, rotating spray jet arms and top and side load capabilities. A closed loop recirculation system lowers chemical usage and employee chemical exposure.

Optional features include a sludge pump and 3 stage filtration. Plus custom screen and squeegee racks can be custom designed and manufactured.

Call us for a consultation on how an SS Series unit can benefit you.
