

Key Features

Clamshell

Top Pressure Plate – The handle attaches to a 4"x5" pressure plate on the top platen instead of a single screw going into the top platen. This provides more even pressure on the outside edges of the press (think of it as pushing down with your entire hand, versus just your thumb).

Display

Easy integrated digital time and temperature settings – Touch-screen controller allows simple dialing in of time and temperature. The current pressure is displayed on the touch-screen display each time the press closes.

Design

The HT-400 now comes with a free Splitter Stand, allowing for the operators to “dress” the shirt easily over the lower platen, keeping the back of the shirt positioned underneath the machine and away from the heat and compression. This is handy when trying to avoid double-compression and heating of a previously applied transfer on the same shirt.

Overview

The HIX HT-400 Clamshell Press is rugged, durable, and made to perform. A must-have for any serious start-up business, the HIX HT-400 has earned respect for its numerous capabilities and reliability.

The easy-to-use open-and-close handle has spring assist and a full range pressure adjustment, provides even pressure on thicker items, and adds 20% more pressure over straight handle designs.

Specifications

Dimensions	21" W x 33" D x 23" H
Weight	84 lbs
Shipping Weight	-- lbs
Volts	120V and 220V
Amperage	12.5 A and 7.5A

Heat Platen Dimensions	15" x 15"
Watts	1500W and 1560W
Maximum Substrate	1"

100% Made in the USA – HIX has its own 110,000 sq ft manufacturing facility with its very own fully integrated aluminum foundry, CNC mill operation, welding, metal forming, wiring, fabrication, assembly, and packaging departments.
