

SubliPro® Countertop Oven

The HIX® SubliPro® Countertop batch ovens are designed for small batch sublimation printing with a maximum production rate of up to 48 – 11/15oz. coffee mugs per/hr. Just like the larger conveyor ovens, this oven can cure sublimation on the same variety of substrates whether they be wide, narrow, white, black, a multitude of different colors, and up to 8.5" tall. This includes the same variety of sizes and shapes such as dog and cat bowls, latte mugs, glasses, bottles, beer steins, and shot glasses, etc. Our patented mug wraps are the necessary companion to provide the even pressure needed to produce a crisp and detailed image on virtually any shaped drink ware substrate.

SubliPro Countertop Oven
(shown with 11/15oz mug wraps)

11/15 Standard Mug Wrap
(shown with 11oz mug)
