Zodiac™ Taurus™ LB White was formulated to print on polyester-cotton fabrics where migration or dye transfer from the fabric to the print occurs. 100% polyester requires the use of Taurus Barrier Black under base. The use of this product fights and controls migration problems but will not eliminate it entirely. In some cases, migration could take many days to occur. In all cases, effectiveness cannot be guaranteed. Discoloration or ghosting could appear in some fabrics.

HIGHLIGHTS

- Passes all requirements for major brand RSL and government regulations.
- This ink has good tensile strength, stretchability, and wash resistance.
- Non-PVC, no lead, no phthalates, no formaldehyde, no APEO's.
- Do not approved for GOTS v6.0
- Easy to mix and print.

PRINTING TIPS

- On 100% Polyester: Apply one layer of Taurus Barrier Black, flash; then, apply 2 layers of Taurus LB White and cure.
- Poly cotton requires print-flash-print-flash and then apply the top color.
- We recommend the user to carry out all relevant tests to ensure that desired results are achieved.

COMPLIANCE
