

SwingMan 20

Key Features

Press

The HIX SwingMan 20 sets the industry standard in heat press design for sublimation and textile heat transfer production. This will provide incredible advantages to the operator – reducing fatigue and increasing productivity.

Display

Easy integrated touch-screen controller including a digital timer reading in minutes and seconds, digital temperature settings that range up to 450° F, and full-range repeatable pressure adjustments for items up to 1-3/4" thick.

Design

What makes the HIX Swingman 20 stand out from all others is the ability to apply over 1200 lbs of downward force with very little effort. Our exclusive progressive linkage method provides a mechanical advantage where a small amount of force on the hand end produces a much larger force on the press end. With the Swingman 20 at maximum pressure, you can literally open and close the press with two fingers!

Overview

The SwingMan 20 is perfect for pressing ceramic tiles, puff transfers, license plates, hot split transfers, glass cutting boards, rhinestones, mouse pads, garments, plaques, and nail heads. This full-sized swing-away press is a must-have for any serious sublimation shop.

Specifications

Dimensions	34" W x 22" D x 20" H
Weight	95 lbs
Shipping Weight	121lbs
Volts	120V and 220V
Amperage	14.5 A and 10A

Heat Platen Dimensions	16" x 20"
Watts	1750W and 2000W
Maximum Substrate	1 3/4"

100% Made in the USA – HIX has its own 110,000 sq ft manufacturing facility with its very own fully integrated aluminum foundry, CNC mill operation, welding, metal forming, wiring, fabrication, assembly, and packaging departments.
