

# UV DTF PRINT LAMINATION SYSTEM

EXCLUSIVELY FROM SPSI

**Produces superior color gamut with bright realistic effects**

The Solis DTF UV Print Lamination System is an inline system that provides incredible flexibility to every print shop. This unit can be used to produce high-quality graphics that can adhere to packaging, outdoor labeling, switch circuits, promotional items, upscale stickers, glassware, and much more, with no weeding!

**EASY TO APPLY**

Brilliant image quality – UV curable digital inks provide superior quality, vivid images of gloss varnish to the tactile dimensions created with embossing features. UV Varnish printing option applied to specific areas of artwork to create eye-catching contrast (aka spot Varnish). UV White under base print option available.

**GLOSS OR MATTE FINISH**

**CYMK, WHITE, & VARNISH**

**AMAZINGLY VIBRANT**

**NO WEEDING**
