FAST FRAME

Whether you are camping for night or a fortnight, the least enjoyable part of any camping trip is setting up the tent...well that was before Fast Frame series of tents came to town. Simply peg out the inner, extend the telescoping poles that lock into place, draw over the flysheet that clips onto the inner tent, set up the awning and you're done. There's no compromising on quality or features either such as the heavy duty 150D Ripstop polyester that is used for both the flysheet and inner tent through to the massive 1.8m awning covering the tent entrance for which a range of accessories is available to allow you to fully enclose it to.
