Design

Options For the Pace of Your Office

Design the solution to fit your needs:

First Select a Desk Style

DT3: Compact console, built for standing desks.

DT5: Set-and-go manual height adjustment.

DT7: All-in-one electric height adjustable desk.

Then Choose an Under Desk Treadmill

TR800: Minimal footprint. Most compact office treadmill on the market.

TR1200: A global favorite. Affordable and accommodating.

TR5000: The flagship. Enduring quality with no maintenance.

Over a billion steps have been taken on LifeSpan treadmill desks since we released our first model in 2011. Our fully redesigned products honor our decade of experience, empowering life-changing wellness and elite working experiences like never before.

Workspace

Elevated Experiences, With Our Desks or Your Own

Standard Features

Elite Tracking:

Intelli-Step™ provides the most-accurate step counting available.

Office Ready:

Enable custom speed limits, audible safety features, and more.

Safety First:

Intelli-Guard™ ensures safety, pausing the treadmill should a user step away.

Precise Exercise Monitoring:

Distance, calories, time, and steps all clearly displayed for personal tracking.

The intuitive DT3, DT5 and DT7 inspire safety, efficiency, and personal fulfillment. Each easy-to-navigate console puts users in complete control, facilitating safe adjustments of under-desk treadmills and display of all wellness data. Good for the bottom line as well as the environment, all models are equipped with energy-saving rest modes.

Desktop

DT3 Standing Desk Console

Mobile Console

The independent, place-anywhere console conveniently pairs with most standing desks.

USB Charging

The DT3's integrated USB charging port allows users to easily charge their personal devices during activity.

Compact Design

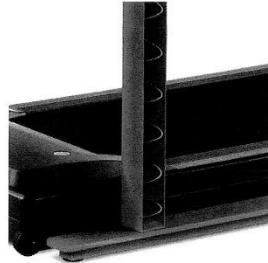

Always within reach but never in the way, the DT3 console weighs a conservative 3 lbs., and measures a modest 12.5" wide by 3" deep.

The DT3 maximizes existing investments by converting standing desks into health-inspiring treadmill workstations. The wired console is inconspicuous and accommodating, and can be placed anywhere on most desktops. Found in corner offices and community work areas alike, the DT3 is compatible with all LifeSpan's under-desk treadmills.

Desktop

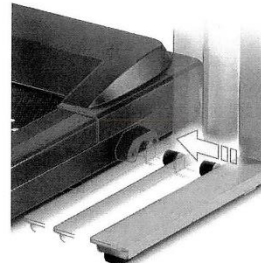

DT5 Manual Height Adjustable Desk

Internal Routing

In-frame wire management directs the desk's power cord down through the frame, improving professionalism and reducing trip hazards.

Interlocking

LifeSpan's touchless, interlocking design connects the DT5 with its accompanying treadmill, enhancing stability and eliminating vibrations at the working surface.

The DT5's manual-height adjustments make it the perfect complement to personal office spaces. The newly-updated desk provides a great range of height adjustments allowing for perfect ergonomic heights whether short or tall. Capture personal style with desktop and frame color combinations.

Desktop

DT7 Electric Height Adjustable Desk

Programmable Console

Change desk height with the touch of a button. Programmable for multiple users and can easily alter from a low 27.5" up to 50.5" in just seconds. Controlling treadmill speeds are just as easy with clear and vivid controls.

Frames Options

The DT7's adjustable frame supports desktop widths from 38" to 72", perfect for a sit-to-walk office environment.

The DT7 is LifeSpan's premier electric-height adjustable desk, including the same features as the DT5, the DT7 is perfect as an assigned workspace for single professionals or for alternating employees in shared environments. Capture personal style with over 30 desktop and frame color combinations. Four desktop sizes are available to satisfy spatial needs, with options ranging from 38" to 72" wide.
