#### CUSTOM IMPRINTING FORM FOR RINGBINDERS

## How To Customize Carstens Side- and Top-Opening Ringbinders

Refer to ringbinder imprinting area guide (pages 2 and 3) and indicate exactly where you would like your logo positioned Step 1. and printed on your finished side- or top-opening ringbinders. The size of your logo may not exceed the size of the printing areas shown. Printing areas shown are 85% of actual size.

Carstens defines camera-ready art as a crisp, clean, black and white image of your facility's logo. We cannot accept colored logos, stationery, photocopies or literature in place of camera-ready art of your logo.

### This is camera-ready art

#### This is not camera-ready art

- Step 2. Choose from our list of stock titles or write your own custom title on the order form below. Indicate where you would like the title to appear in areas A-H. Check the dimensions of any title you select. Make sure it will fit in the desired printing
- Refer to Carstens catalog or visit www.carstens.com to choose your ringbinder color and one imprint color (black, gold, silver Step 3. or white).
- Step 4. Mail or e-mail your logo to Carstens in the exact size you wish your logo to appear on your finished imprinted binder.

If sending your logo electronically, send it as a black and white file, actual size, 300 dpi, in either a tiff, eps or pdf format to carstens@carstens.com. Do not fax artwork. There is a 3-5 working day waiting period for artwork produced or reproduced by Carstens.

Complete the order information section and mail or fax it to: Step 5.

> Carstens Customer Service Department 7310 West Wilson Avenue Chicago, IL 60706 Fax: 1-800-669-1559

All submissions are subject to review and return to ensure proper imprinting. Custom imprinting requires a minimum order of 25 ringbinders. Imprinting is available in one color per binder. Carstens ringbinder covers are guaranteed for four years. Our custom imprinting may wear with ordinary use and is not subject to the same guarantee. Final positioning of your logo imprint may vary by as much as 1/16" in any direction due to manufacturing tolerances.
