

Daytime - Calm | Relief

Our daytime botanical tinctures are **Broad-Spectrum** extracts. In addition to CBD, they contain other beneficial cannabinoids and terpenes from hemp flower, with zero THC.

To guarantee consistency, Dr G. has formulated specific combinations of terpenes such as β -Caryophyllene, limonene and others, selected to bring Relief and Calm, without any drowsy effects.

*Dosage Recommendations - Take 1 dropper (1 mL) containing 40mg of Broad-Spectrum CBD per day, all at once or half in the morning and evening after a meal or snack. Give it time. Wait 1-2 weeks before increasing dose by 1/2 dropper per day if needed.

Nighttime - Sleep

Our nighttime botanical tincture is a **Full-Spectrum** hemp extract, which means that not even THC is left out.

THC is concentrated at a low 0.3% that won't get you high, but combines with a complement of relaxing terpenes like myrcene and linalool to promote a good night's sleep.

We add an additional boost of cannabidiol (CBN) to seal the deal.

*Dosage Recommendations - Take 1/2 dropper (0.5 mL) containing 20mg of Full-Spectrum CBD, sleep support terpene blend and ~1.5mg THC - in the evening. Give it time. Wait 1-2 weeks before increasing dose by 1/2 dropper per day if needed.

Calm Down Buddy

Just want to take the edge off your pet's attitude?

High strung, nervous, off the wall....

Help your buddies deal with everyday worries with a specifically formulated terpene blend and hemp extract for calm.

*Start with 1 drop per 10lb of your pet's total weight, once a day.

*For best results, drop oil onto food or treats, directly before consumption.

*Give it time. Wait 1-2 weeks before increasing dose by 1 drop per 10lb if needed.

Have Some Relief

Your pets have problems just like us parents!

The bones don't move like they used to.....

Give them some relief from the daily struggles with our specifically formulated terpene blend and hemp

*Start with 1 drop per 10lb of your pet's total weight, once a day.

*For best results, drop oil onto food or treats, directly before consumption.

*Give it time. Wait 1-2 weeks before increasing dose by 1 drop per 10lb if needed.

**TENNESSEE
FARMACEUTICALS**
BOTANICAL WELLNESS

With a sea of CBD products available in the market, why should you choose a product from Tennessee Farmaceuticals?

We are different!

615-216-4848 ext 1
www.tnfarmaceuticals.com

We aren't different just for the sake of it. The components that go into our products are different, crafted from the soil up and specifically formulated with the care and expertise of a uniquely experienced team.

Specifically Formulated

Our products are formulated with specific hemp extracts, cannabinoids and terpenes that target different desired effects.

Terpenes make up the smells and flavors of most plants worth smelling and tasting. They are the essential chemical language of flowers, fruits and trees. The smell of fresh citrus, a pine forest in springtime or a bundle of lavender... these aromas come from a precise mix of terpenes released by each.

Likewise, hemp flower is rich in terpenes that create different balance and effects across its many different varieties. By adding select terpene blends and hemp extracts, we use nature's own way to sculpt each hemp botanical tincture towards a different desired effect.

Our Founders

Carmel Monti - CEO

Carmel is a developer of "living soil" and has been growing botanicals and crafting products for wellness for over 15 years. He has produced soils for cannabis facilities and knows how to start the whole process with the right soil and amendments to grow healthy, organic and strong plants, naturally.

Henry David Thoreau said it best. "Heaven is under our feet as well as over our head." It starts with the soil.

Dr. G, Greg Gerdeman

Our resident doctor, Dr. G, is a renowned and pioneering expert in cannabis and how it works. He has studied and taught the pharmacology of cannabis for over 20 years as a researcher, college professor and leading industry scientist.

Our founders and team are experienced in cannabis and love nature's best with regard to soil and growing plants that are good for health. We hope you benefit from our specialized formulas and thank you for your business.

Around the Clock

We have designed an all around the clock series of hemp extracts to help you throughout the day.

Calm for those times when you are stressed out. **Relief** when you have overdone your workout or are sore and need some relief for your body. **Sleep** before bedtime and for a good night's rest.

All are available in our 10mL trial pack in an easy to carry pouch, so you can always have them with you. Once you determine that they work for you, try our 30mL size, in a set or one at a time.

For Paws - Pet Tinctures!

Meet Maisie! She's our CEO's pup, who is our mascot and inspiration for our new line of pet tinctures.

All animals, including vertebrates (mammals, birds, reptiles, and fish) and invertebrates (sea urchins, leeches, mussels, nematodes, and others) have been found to have endocannabinoid systems, save the exception of insects. That means if your pet isn't an insect, it has receptors for CBD and other cannabinoids.

Our pet line comes in both full and trial sizes (10mL and 30mL) in the same concentration of CBD.
