Install Beast Soft Goods Passenger Side Garage Organizer

1. Install Passenger Side Garage Organizer

a. With a speed square or tape measure mark a location down 4 3/4" from the top of the frame and 2 1/4" from the front of the frame. (Figure 1) Then use (1) 3/4" wafer screw and secure the screw in the top left corner of the passenger side organizer. (Figure 2) It may be helpful to have a second set of hands hold the organizer when getting the first screw started.

b. Then move to the opposite end of the organizer, near the back doors, use the speed square to align the grommet holes centered at the same 4 3/4" down, (Figure 3) and secure the organizer panel in place with a 3/4" wafer screw. Next align the notch of the organizer panel with the access door and secure in place with a 3/4" wafer screw. (Figure 4)

c. Tension the panel down to the lower back corner and secure using a 3/4" wafer screw. (Figure 5) Then align the organizer with the front edge of the trim nearest the kitchen cabinet base and secure using a 3/4" wafer screw. (Figure 6)

Install Beast Soft Goods Passenger Side Garage Organizer

d. Install the remaining (8) wafer screws, making sure to keep the garage organizer tight against the panel and work back and forth or top to bottom. (Figure 7)

e. With the (13) wafer screws secured on the passenger side garage organizer, the install is complete. (Figure 8)
